

Amir Abdolahi

Full-stack developer — Telegram bots, Mini Apps, web apps

Email: amirabdolahi211@gmail.com | Portfolio: amir-dev.pages.dev | Reddit: [u/amirabdolahi](https://www.reddit.com/u/amirabdolahi) | Remote

SUMMARY

Freelance developer building Telegram bots, Telegram Mini Apps, landing pages and small full-stack web apps with TypeScript, React, NestJS and Cloudflare. I work on fixed quotes, ship a working demo early and hand over full source code on delivery. Payment in USDT or via escrow.

PROJECTS

SorenFit — AI fitness web app

sorenfit.ir

Cloudflare Pages, Pages Functions, D1, Gemini API, JavaScript, HTML/CSS

- AI-generated workout and nutrition plans using the Gemini API.
- Interactive anatomy picker for target muscles, progress tracking and an admin panel.
- Serverless deployment on Cloudflare Pages with a D1 (SQLite) database.

MBA rank-estimate Telegram bot (@mba_1406_bot)

t.me/mba_1406_bot

Telegram Bot API (webhook), Cloudflare Pages Functions, JavaScript, Python (data model)

- Estimates a candidate's national exam rank from their section scores.
- Model built from about 544 published score reports; also estimates admission chances per university by quota.

Telegram Mini App social platform (private project)

Demo on request

NestJS, Prisma, PostgreSQL, grammY, React, Telegram Mini Apps, Telegram Stars

- Bot built with grammY plus a React Mini App front end and NestJS + Prisma API on PostgreSQL.
- In-app chat, Telegram Stars payments and an admin moderation panel.

Telegram Mini App shop — demo

amir-tma-shop.pages.dev

JavaScript, Telegram WebApp SDK, Cloudflare Pages

- Runs inside Telegram and in a normal browser: theme params, MainButton, BackButton, haptics.
- Catalogue, cart, simulated USDT/TON checkout and an admin orders view with mock data.

Token landing page — demo

amir-token-demo.pages.dev

HTML, CSS, JavaScript, SVG, Cloudflare Pages

- Mobile-first crypto project page: hero, interactive tokenomics chart, roadmap, how-to-buy, FAQ.
- Wallet-connect modal (demo only) ready to be replaced with TON Connect or WalletConnect.

SKILLS

Languages: TypeScript, JavaScript (Node.js), HTML, CSS

Front end: React, Telegram Mini Apps (WebApp SDK), responsive / mobile-first UI

Back end: NestJS, Node.js, Prisma, PostgreSQL, REST API integrations

Telegram: Telegram Bot API, grammY, Mini Apps, Telegram Stars payments

Cloud / AI: Cloudflare Pages, Workers, D1; Gemini API

EDUCATION

BSc Mechanical Engineering

Islamic Azad University — graduated 2026

LANGUAGES

English — professional working proficiency

Persian — native

HOW I WORK

Fixed quote within 24 hours · 50% upfront in USDT (TRC20 / BEP20 / TON) or escrow · first demo within 72 hours · remaining 50% on delivery with full source code.
